

# ANYVIEW

## Custom Smartlists for Dynamics GP and the Web

AnyView Creator enhances Smartlists with custom lists, access to data not available to Smartlists, and secure web access to your Smartlists. Maximize your Smartlists, view data from outside Dynamics® GP, whether in your office or on the road.

### Build your own

AnyView Creator enhances Smartlists by gaining access to the information in your accounting system not accessible with existing Smartlists. By building additional Smartlists, you can maximize the capabilities of your existing system.

### Web-enabled

AnyView Browser provides secure inquiry access to your Dynamics® GP solution from anywhere and displays your data in a variety of layouts designed to make the data useful and meaningful. AnyView transforms raw data into information that you can act on to make faster and better decisions.

### AnyView Creator Features

- Advanced Gotos can open any Dynamics® GP window to improve navigation flexibility and help with workflow.
- File publishing capability for Smartlists that organize, list and open files.
- User-specific results for per user row level restriction of records.
- Access to data sources outside of Dynamics® GP to report on all of your organizational information.

### AnyView Browser Features

- Smartlists accessible over the internet or intranet.
- A simple interface that users will find easy and useful.
- Empower your team with information to make better business decisions.
- Enable customers to see their data (such as when an order shipped) on their own terms.
- Provide management with key business metrics that they can access anywhere, anytime.
