

# Forms Printer

Transactional Reporting Integration for Dynamics GP

## Why Forms Printer?

- **Integration**  
expands the boundaries of report design to **SQL Reporting Services** and **Crystal Reports**, so you can now include ISV application data, meet complex reporting needs and even provide custom report processing.
- **Delivery Capabilities**  
enable predefined setups for printing, Emailing with Outlook, and delivery to file in a flexible variety of formats.
- **Flexible Options**  
allow for a fast, simple setup that will have you up and running in minutes.
- **Powerful Features**  
meet the most sophisticated needs allowing for per report format, company, customer or vendor setup options.

### Flexible Delivery and Setup Options

- Reports can be automatically Emailed as attachments or saved to file in a variety of formats including PDF.
- Report Templates get you up and running fast.
- Using Forms Printer means no more Report Writer complexity or limitations and less maintenance. Accomplish better reporting results in a few simple designs rather than the hundreds of reports that you would have to maintain in Report Writer.
- Setup options in Forms Printer allow each Customer or Vendor to have their own print setup including unique reports for each Customer or Vendor.

### Complete Integration

Forms Printer has a complete integration to a large number of Dynamics Forms and ships with default templates for each:

- SOP Quotes, Orders, Invoices, Returns, Backorders, Packing Slips, Picking Tickets, and Fulfillment Orders
- Purchase Orders
- RM Documents & Statements
- Payroll & Payables Checks
- PM Remittance
- Invoicing Documents
- Manufacturing QA NSR & SCAR
- Project Accounting Invoices
